I subscribe to satellite radio because I was tired of the obscenities, innuendo and filth on public radio. The DJs on all stations no longer care about the most basic level of civility or respect for the vast majority of families and singles who find constant swearing and discussion of bathroom activities or sex tedious. If your decision forces me to return to public radio for weather, traffic or other local news I will just live without it. I will not go back to public radio as it exists today.
